This material and the information contained herein is for general information purposes only and is not intended, and does not constitute, legal, reimbursement, business, clinical, or other advice. Furthermore, it is not intended to and does not constitute a representation or guarantee of reimbursement, payment, or charge, or that reimbursement or other payment will be received. It is not intended to increase or maximize payment by any payer. Abbott makes no express or implied warranty or guarantee that the list of codes and narratives in this document is complete or error-free. Similarly, nothing in this document should be viewed as instructions for selecting any particular code, and Abbott does not advocate or warrant the appropriateness of the use of any particular code. The ultimate responsibility for coding and obtaining payment/reimbursement remains with the customer. This includes the responsibility for accuracy and veracity of all coding and claims submitted to third-party payers. In addition, the customer should note that laws, regulations, and coverage policies are complex and are updated frequently, and, therefore, the customer should check with its local carriers or intermediaries often and should consult with legal counsel or a financial, coding, or reimbursement specialist for any questions related to coding, billing, reimbursement, or any related issues. CODING AND REIMBURSEMENT FOR RADIOFREQUENCY ABLATION (RFA)

Pre-Procedure Requirements

Most insurance providers require at least one diagnostic procedure for each treated site, with some requiring two. Please check with the payer before performing any radiofrequency (RF) procedure to be sure you have completed all required step therapies.

Appeals

There are numerous reasons that a facility or physician may face a denied, pending or underpaid claim.

Claims are typically denied or pending for four reasons:

- The claims processors have made an administrative error
- The claim forms contain clerical errors
- The payer has not deemed the procedure to be medically necessary
- The payer's requests for information have gone unanswered by the patient

Appealing Denied Claims

A denied claim can be appealed. When a claim has been denied, review the Explanation of Benefits (EOB) for an explanation of the denial.

Immediately contact the payer if the EOB does not explain the reason for the denial and request an explanation. In cases where the denial was a result of a clerical error on the claim form, confirm the correct code with the payer and resubmit the corrected claim form.

Other reasons for a denied claim may include:

- The technology is considered investigational
- The CPT[‡] code does not meet the diagnosis code
- The medical necessity has not been determined

Should your claim have been denied for one of these reasons, it is best to contact the payer directly in order to offer additional information about the procedure. You should ask the claims processor to indicate which additional materials should be provided in order to potentially reverse the original coverage determination. If you feel that your claim has been underpaid, contact the claims office indicated on the patient's EOB and request a review of your claim.

Reasons for underpayment of a procedure include but are not limited to:

- The coding of the procedure performed is incorrect
- The lack or misuse of an appropriate modifier
- The lack of supporting documentation

You will find that each payer has its own unique review process. It is best to contact the payer for the exact guidelines. In most cases, however, you will be asked to submit your appeal request in writing. When contacting the payer, be sure to inquire as to where the request should be sent and to whose attention it should be directed.

If you have additional reimbursement questions, please call the Reimbursement Hotline at (855) 569-6430.
